

The Company

Since 1980, Lubritalia has been producing lubricants and other specialties for metal (steel, aluminium, copper) industry. The manufacturing plant is located in Palagiano (TA) and it spreads over an area of about 18000 square meters.

Since 2000, Lubritalia has started the production of chemical specialties for the aluminium industry. After about 20 years, Lubritalia is a leader in the Italian market of specialties for the aluminium industry.

Today, Lubritalia has about 50 employees that allow business relationships in the Italian market and in Mexico, Russia, Middle East, India, China, Turkey, Finland, Tunisia, etc. Lubritalia has ISO 9001, ISO 14001, ISO 18000 and ISO 37001 certifications.

Specialties For Hot Rolling

EMULSIFIABLE OILS FOR HOT ROLLING

- good lubricity,
- reduction of surface defects,
- excellent stability.

Specialties For Cold Rolling

ADDITIVES FOR COLD ROLLING

Based on synthetic alcohols, esters, acids or their mixtures.

- high lubricity and purity,
- reduction of surface defects,
- high volatility and stability under thermal treatment conditions,
- compliant with FDA, Kosher and Halal rules for the production of food/pharma packaging.

Other Specialties

- Fluids for slab casting mold and slab milling,
- tension leveller fluids,
- prelubes and neat/vanishing lubricants for mechanical operations on coils, strips and panels,
- release agents for panels,
- grinding fluids and rust preventive oils for rolls.

Non-Staining Lubricants

HYDRAULIC FLUIDS and BEARING LUBRICANTS

- non-staining. In case of contamination of the working fluid, their residue do not produce stains during thermal treatments,
- compliant with FDA, Kosher and Halal rules for the production of food/pharma packaging.

Research is the key of customer satisfaction

R&D & TECHNICAL ASSISTANCE

Day after day, our Technical Assistance and R&D Departments join their efforts to improve the features of the products. Our technicians design each product starting from a deep knowledge of the specific processes in order to propose solutions that meet the Customer needs and reach the highest levels of performance. As they know the Chemistry involved both in processes and products, are able to optimize efficiency, managing and customization of our products.
