

## The Company

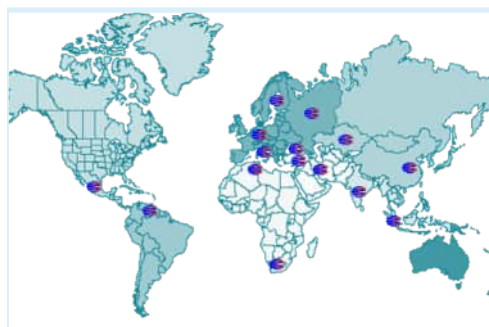

Lubritalia is a 40 years lubricant producer for steel, aluminium, copper and alloy industries.

Production for all products integrated steel producers needs

All our production could be tailored to the customer's needs because we are flexible and have a very strong attitude to solve the different challenges happening in working processes.

The Italian factory covers an area of over 18000 square meters, but growing market has led us to open new business relationship in Mexico and Russia, Middle East, China, Turkey and India.

Lubritalia has ISO 9001, ISO 14001, ISO 18000 and ISO 37001 certifications.

Lubritalia worldwide activities

## Specialties Emulsifiable Metalworking Fluids

### EMULSIFIABLE METALWORKING FLUIDS

#### LUBRO SINT SERIES

Designed for grinding processes, are synthetic soluble fluids with the following properties:

- High anticorrosion properties;
- reduction of surface defects;
- high stability;
- great antibacterial power.

#### LUBRO EMUL 200 & 300 SERIES

Semi-synthetic emulsifiable fluids for general machining operations.

Properties:

- high lubricity;
- no secondary ammine;
- high anticorrosion and antibacterial properties.

#### LUBRO EMUL 400 SERIES

Emulsifiable oils for hard metalworking operations, with EP performances.

Properties:

- high anticorrosion power;
- increasing in tools shelf life;
- high lubricity;
- no formaldehyde donour.

#### LUBRO EMUL GAR SERIES

Emulsifiable oils for machining operations.

Properties:

- high anticorrosion power;
- no secondary ammine;
- no formaldehyde donour;
- no biocide.

## Specialties Neat Metalworking fluids

### NEAT METALWORKING FLUIDS

Applications:

- deep hole drilling,
- turning,
- milling,
- thread cutting,
- broaching operations,

#### LUBRO NEAT EV SERIES

Synthetic and vegetable esters fluids EP inactive additivation free from chlorine and mineral oil. Suitable for steel, aluminium, copper & alloy.

#### LUBRO NEAT SS SERIES

Synthetic esters fluids EP inactive additivation free from chlorine and mineral oil. Suitable for steel, aluminium, copper & alloy.

#### LUBRO NEAT EPS SERIES

Mineral oil based fluids EP inactive additivation free from chlorine. Suitable for steel, aluminium, copper & alloy.

## Rust Preventive Oils Series

### LUBRO RUST OFF 120

- Rust Preventive Oil mineral oil based

### LUBRO RUST OFF 60

- Rust Preventive Oil "vanishing"

### LUBRO RUST OFF 100

- Rust Preventive Oil "dewatering"

### LUBRO RUST OFF LT

- Rust Preventive Oil "long term" protection.

Research is the key of customer satisfaction

## R&D & TECHNICAL ASSISTANCE

Day after day, our Technical Assistance and R&D Departments join their efforts to improve the features of the products. Our technicians design each product starting from a deep knowledge of the specific processes in order to propose solutions that meet the Customer needs and reach the highest levels of performance.
